OUR PHILOSOPHY & MISSION:

At Colorectal Surgery Services, we pride ourselves on a unique patient-centered practice and do everything possible to make visits pleasant for our patients. We strive to maintain the loyalty of patients and referring doctors. **Our mission is to advance the art and science of colon and rectal surgery.**

T. SPENCER SKELTON, MD brings experience from Houston's Texas Medical Center to the San Antonio area.

Dr. Skelton received his Bachelor of Science from Texas A&M University in Biomedical Science. He then spent a short time in Nashville, Tennessee, working in the field of human organ transplantation and volunteering internationally. This experience led him back to Texas, where he obtained his medical degree from The University of Texas Health Science Center in Houston. He completed his General Surgery Residency and his Colorectal Surgical Fellowship at the Houston Methodist Hospital and The Colon and Rectal Clinic of Houston, located in the Texas Medical Center. His training provides him with the added skill and experience to manage complex disease processes of the colon, rectum, and anus. While in residency, he also completed a two year fellowship in transplantation immunology. He has presented his work at several local and national meetings, including the American College of Surgeons Annual Symposium.

Ultimately, under the guidance of several prominent colon and rectal surgeons, Dr. Skelton changed his career path to that of colon and rectal surgery. His surgical interests include benign and malignant disease of the colon and rectum, anorectal disease such as anal fistula, and minimally invasive surgery. He is board certified in *both* general surgery *and* colon and rectal surgery. He is an active member in the American College of Surgeons, American Society of Colon and Rectal Surgeons, and served as the president of the Texas Society of Colon and Rectal Surgeons.

Born and raised in the Piney Woods of Texas, Dr. Skelton has spent the last twelve years living in Houston, before relocating to the Hill Country. He met his wife in medical school and they now have two little boys. In his spare time, he enjoys fishing with his children and playing golf. He is a member of the New Braunfels Mens' Golf Association and the Comal County Texas A&M Former Students Association.
